

IV International Course **in Participatory Health Research**

People and families living with chronic illness:
reorganizing services through participatory health
research

29/01/19 Morning

Introduction and background of participatory health research

Irma Brito
Fernando Mendes
Márcia Cruz

Introduction and presentation of the course objectives
Historical background and theoretical foundations of participatory health research
Concepts and definitions
How to set up a research group

Projects debate to identify quality criteria of the PHR as defined by ICPHR

29/01/19 Afternoon

Ethics and peer research in the development of participatory research

M^a do Céu Barbieri
Lina Bernadineli
Irma Brito
Erla Svavasdottir

Ethical and leadership issues in participatory research
Defining functions: peer research
Creation of biological communities: the PRECEDE-PROCEED model
Implementation of the MCAF in the Paediatric Hospital of Reykjavík

Projects debate to identify ethical requirements of the PHR as defined by ICPHR

30/01/19 Morning/Afternoon

Development of a participatory research project

Cirilla van der Donk
Carminda Morais
Donizette Daher
Verónica Coutinho
Sónia Marcon
Maria Henriqueta Figueiredo

(Re)designing a research project. Concepts and models
Health Literacy
Empowerment
Debriefing as a care model
Dynamic Model of Family Assessment and Intervention: a collaborative approach in family nursing

Contents of sessions 1 and 2 are included in the design of the project with the local research group

31/01/19 Morning/Afternoon

Participatory research data collection and analysis

Maria do Céu Barbieri
Márcia Cruz
Donizette Daher
Lina Bernadineli
Hayda Alves
Paulo Queirós
Fernanda Príncipe

Data collection and analysis
Methods and techniques
Discussion of practical aspects of each project
Reproduction, transformation and impact of participatory research Processes of shared knowledge: reproducibility and transferability

The contents of previous sessions are used in the design of data collection and analysis with the target groups

01/02/19 Morning

Projects' history: discussion and problem-solving

Irma Brito
Fernando Mendes
Paulo Queirós

Projects' history and problem-solving and/or participants' alternatives
Dissemination of participatory research: the scientific communication versus the news
Law and lobbying

01/02/19 Afternoon

Intermediate course's evaluation

Irma Brito
M^a do Céu Barbieri
Márcia Cruz
Verónica Coutinho
Carminda Morais
Magda Faria

Intermediate course's evaluation
Presentation and reflection of the presented projects

The projects must be concluded.

Design of the scientific presentation and selection of media to exhibit the projects.

8 days. Reflection on the participatory research projects

Irma Brito Maria do Céu Barbieri Márcia Cruz Paulo Queirós Verónica Coutinho Fernando Mendes Carminda Morais Fernanda Príncipe Donizette Daher Hayda Alves Lina Bernadineli Magda Faria	15.05.19 16.05.19 In class/Virtual (Presentation and reflections of the presented projects) 28.02.19 30.04.19 27.06.19 Virtual (to be settled)
--	---

16-17/07/19

Presentation of the participatory research projects

Irma Brito Maria do Céu Barbieri Márcia Cruz Paulo Queirós Verónica Coutinho Fernando Mendes Carminda Morais Fernanda Príncipe Donizette Daher Hayda Alves Lina Bernadineli Magda Faria	Project presentation (seminar) and reflection on the sustainability of the Participatory Health Research Reflections on scientific writing and oral presentations/posters Development of links between national and international projects
